ATLAS ABRASIVES

COMPETITIVE SOLUTIONS
FOR CUTTING,
GRINDING, SANDING
& FINISHING.

CONTENTS

Atlas provides competitive solutions for cutting, grinding, sanding and finishing in the metal fabrication, maintenance and repair, wood, construction and hardware industries.

A NEW BRAND IMAGE

This year, we're delighted to unveil a new brand design across the Atlas portfolio, from product packaging and merchandising, to the catalogue and website. Evolving the brand provides a fresh, contemporary look and feel. We've also spent time understanding what's important for our customers and end users when selecting the products they need. This is reflected in the use of larger branding across the design for instant recognition, improved use of colour coding for better differentiation between products, inclusion of application imagery and the addition of clear quality tier communication. In addition, the product portfolio itself has expanded, and now offers more coated abrasive solutions than ever before!

Whilst changes have been made, rest assured, we continue to provide value and simplicity through a cost-effective range of products with the same great quality you've come to expect from Atlas.

DESIGN EVOLUTION

Improving communication through:

- Larger branding
- Use of brighter, more impactful colours.
- Addition of application imagery
- Clear quality tiering

DIFFERENTIATION IN THE RANGE

Across many product lines, Atlas offers a choice of abrasive performance, providing better product differentiation with a new quality tiering system of 'good' (Bronze) and 'better' (Silver) based on price versus performance, aligned to customer needs.

BRONZE

GOOD PRODUCT PERFORMANCE

Great value with the good performance you'd expect from Atlas, at a competitive price.

SILVER

BETTER PRODUCT PERFORMANCE

Better overall performance, whether that's product life, cutting speed or material removal rate, satisfying your expectations for performance.

OUR MARKETS

For performance and value, look no further than Atlas abrasives. We have products for cutting, grinding, sanding or finishing, a solution for your customers.

METAL FABRICATION

At Atlas you'll find abrasives used in the manufacture of gates, fences, shutters, metal frames for industrial equipment, pre-fabricated metal sheets and scaffolding.

MAINTENANCE & REPAIR OPERATIONS

Abrasive solutions for cutting and grinding, sanding and cleaning, in maintenance and repair applications.

CONSTRUCTION & HARDWARE

You can rely on Atlas to provide safe & reliable products and solutions for building, renovating and improving our habitat.

WOOD INDUSTRIES

Atlas caters for calibration, sanding and tool sharpening applications in the carpentry, furniture manufacturer, parquetry and chipboard industries.

SUPPORTING SUSTAINABILITY

IN THE ABRASIVES INDUSTRY

Saint-Gobain is proud to be an active member of SEAM - Sustainable European Abrasive Manufacturers.

An initiative from FEPA, the SEAM program guarantees that member organisations from within the abrasive supply chain manufacture and distribute products according to new standards, to support sustainable growth in production and distribution.

The aim is to balance environmental efficiency, production performance and labour safety by meeting a series of requirements related to three pillars:

ENVIRONMENT

LABOUR

ECONOMY

Saint-Gobain Abrasives is committed to preserving the environment and resources, reducing inequalities and improving daily life for all. It's more than an expectation, making a positive contribution has become a requirement for all our stakeholders. We all have a part to play in ensuring our processes, products and the health and safety of our employees is maintained and allows our industry to operate sustainably now and in the future.

For more information visit www.saint-gobainabrasives.com

MERCHANDISING DISPLAYS

Atlas branded product displays are available to showcase the product range in an easy, attractive way that is also space saving. Contact your local Atlas representative for more information.

DISPLAY KIT

- The complete kit comes with all components needed to create a full display for any Atlas product range.
- Kit contains: Base x1, pegboards x4, header x1, shelf x1, bar with 5 pins x2, legs x2, pegs x72
- Accessories can be ordered separately if required.

STAND KIT (mm)	QTY	ART NO.
Display:	1	MTO
2300 x 1030 x 500		

PORTABLE DISPLAY

- Kit contains unit x1, header x1, pins x40, bar with 2 pins x4

PORTABLE KIT (mm)	QTY	ART NO.
Display:	1	MTO
1740 x 380 x 580		

ONLINE ORDERING MADE EASY

With MyAbrasives, the ordering process is simple:

Search for your product

Add to basket

Go to checkout

MAKING ORDERING EASIER:

1. Detailed product information and specifications, including images and videos
2. Access to order confirmations, product availability and delivery lead times
3. Available from smartphones, tablets and PCs 24/7
4. Automatically creates a list of most frequently ordered products for ease of future ordering
5. Save favourite lists to make ordering quicker and easier

REGISTER TODAY

To register call your local customer service team and start using MyAbrasives today.

MYABRASIVES FEATURES AND SERVICES INCLUDE:

- **Product search:** search by UPC, name, category, EAN number and filter and sort search results,
- **Order history and reordering:** see your past orders across all platforms (EDI, ABx, phone and fax). Invoices, debit/credit notes and shipping status will also be visible in the 'Order History' section
- **Quotes:** request and track quotes directly
- **Saved orders:** save orders for future reference by putting multiple items in your cart and saving. You can also add a note to indicate future order frequency
- **Bulk orders:** upload a CSV file directly into the system rather than having to search for each product individually
- **Recommended for you:** shows related products you may like to order
- **Extra support:** navigate the system with FAQs and how-to videos or contact our dedicated helpline

GENERAL PRECAUTIONS

Safety instructions provided by the machine manufacturers must be followed. All guards, covers and hoods must be in place on the machine during grinding, and should not be modified in any way. Abrasives should not be used near inflammable material.

Sparks should be directed away from the face and body, if possible towards the floor. Dust extraction equipment must be used whenever it is available. The instructions for use given by the abrasive manufacturer must be followed e.g. 'Not to be used without a support', or 'Not to be used for wet grinding'. The workpiece must be firmly fixed before grinding starts. Check all abrasives visually before use and make certain that the product is suitable for the application. No modifications should be made to abrasive products after delivery. When using a portable grinder always switch it off and allow the spindle to stop completely before putting the tool down.

UNDERSTANDING THE PRODUCT

COATED ABRASIVES

Atlas has a range of fiber discs, flap discs, belts, discs, rolls, sheets and flap wheels for applications including heavy stock removal, grinding, cleaning, blending and finishing operations.

WHAT IS A COATED ABRASIVE?

When abrasive grain is strongly fixed to a flexible backing using adhesive, this is known as a 'coated' abrasive. The adhesive is applied with a minimum of two applications. The first, or 'maker' coat adheres the abrasive grain to the backing ensuring correct orientation. After curing, the second 'size' coat is applied. The sizer adhesive, united with the maker bond, provides final grain anchoring and the proper total adhesive level for the finished product.

ABRASIVE TYPES

The ideal abrasive grain offers maximum resistance to wear, yet fractures before serious dulling occurs, satisfying both stock removal and finishing requirements.

THE TYPES OF GRAIN MOST COMMONLY USED ARE:

Aluminium oxide: tough grain for grinding high tensile materials, such as carbon steel, alloy steels, tough bronze and hard woods. Wherever toughness (ability to resist fracturing) is the main consideration, aluminium oxide out performs all other coated abrasive grains. A great solution for users looking for an affordable abrasive product.

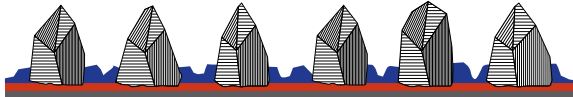

Zirconia alumina, unique self-sharpening grain for long life on demanding stock removal and heavy grinding operations. Ideal for planing wood, due to the controlled fracturing of the grain, which continuously produces sharp abrasive points. Has an excellent price vs. performance ratio.

BACKING TYPES

Whether paper, cloth, vulcanised fibre, a cotton or polyester film, the backing must be smooth enough for uniform adhesive coating, strong enough to withstand grinding pressures and flexible enough to conform to contours (if necessary).

ABRASIVE GRAIN TYPES

The ideal abrasive grain offers maximum resistance to wear, yet fractures before serious dulling occurs, to satisfy stock removal and finishing requirements.

GRAIN TYPE	BOND / TOUGHNESS	STRUCTURE	PROPERTIES / WEAR PROPERTIES
SILICONE CARBIDE (SIC)	Very hard / less tough	Crystalline	Sharp-edged, brittle, highly friable / micro wear 
ALUMINIUM OXIDE	Hard / tough	Crystalline, irregular	Wedge-shaped, block grain, even wear 
ZIRCONIA ALUMINA	Hard / very tough	Crystalline, even	Wedge-shaped, block, drop formed grit / micro wear, self-sharpening 

SAFETY IN USE

All coated abrasives should be handled carefully. Safety goggles, safety gloves, dust masks should be worn. Safety instructions provided by machine manufacturers must be followed. Make sure the abrasive is suitable for the application before use. No modifications should be made to the product.

STORAGE CONDITIONS

Coated abrasives should be stored in dry frost free conditions. They should be kept away from cold and damp, and not be exposed to high temperature variations or direct sunlight. Excessively dry or humid storage may incur deformation.

FLAP DISCS FOR ANGLE GRINDERS

ZIRCONIUM FLAP DISC **SILVER** ★★

Sharp zirconium grain for a fast cut from the very beginning. Tough polyester backing for excellent product life and more material removal with one disc. Lower disc wear for longer grinding time, without loss of cut throughout disc life. Ideal on medium to high pressure applications on carbon steel and hard metals.

DISC SHAPES

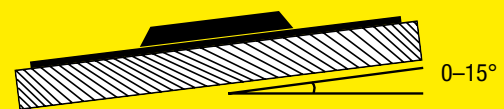

TYPE 29 CONICAL

- For both contoured surfaces and edge work
- Angled flaps offer greater contact when removing stock on flat surfaces
- The best choice for fast stock removal

TYPE 27 FLAT

- For use on flat surfaces
- Best choice for blending & finishing

DISCS FOR ORBITAL SANDERS

SANDING DISCS 130

SILVER ★★

SELF-GRIP

Premium Aluminium oxide grain for an improved cut-rate. D weight paper backing for longer product life and support when sanding. Designed for dry applications on all kinds of painted and primed surfaces in automotive, marine and construction applications or wood sanding.

SANDING DISCS P37C SILVER ★★

SELF-GRIP

Premium heat-treated aluminium oxide abrasive blend for better cut rate and consistent scratch pattern for a quality result from start to finish. Reinforced lightweight paper backing provides better flexibility and finish than discs with heavier backing, discs can even be folded for hand use. The stearate coating applied to the grain resists dust buildup and clogging and extends the life of the disc so you can work longer without changing the product, saving time and money. Designed for wet or dry sanding.

SANDING DISCS A293 BRONZE

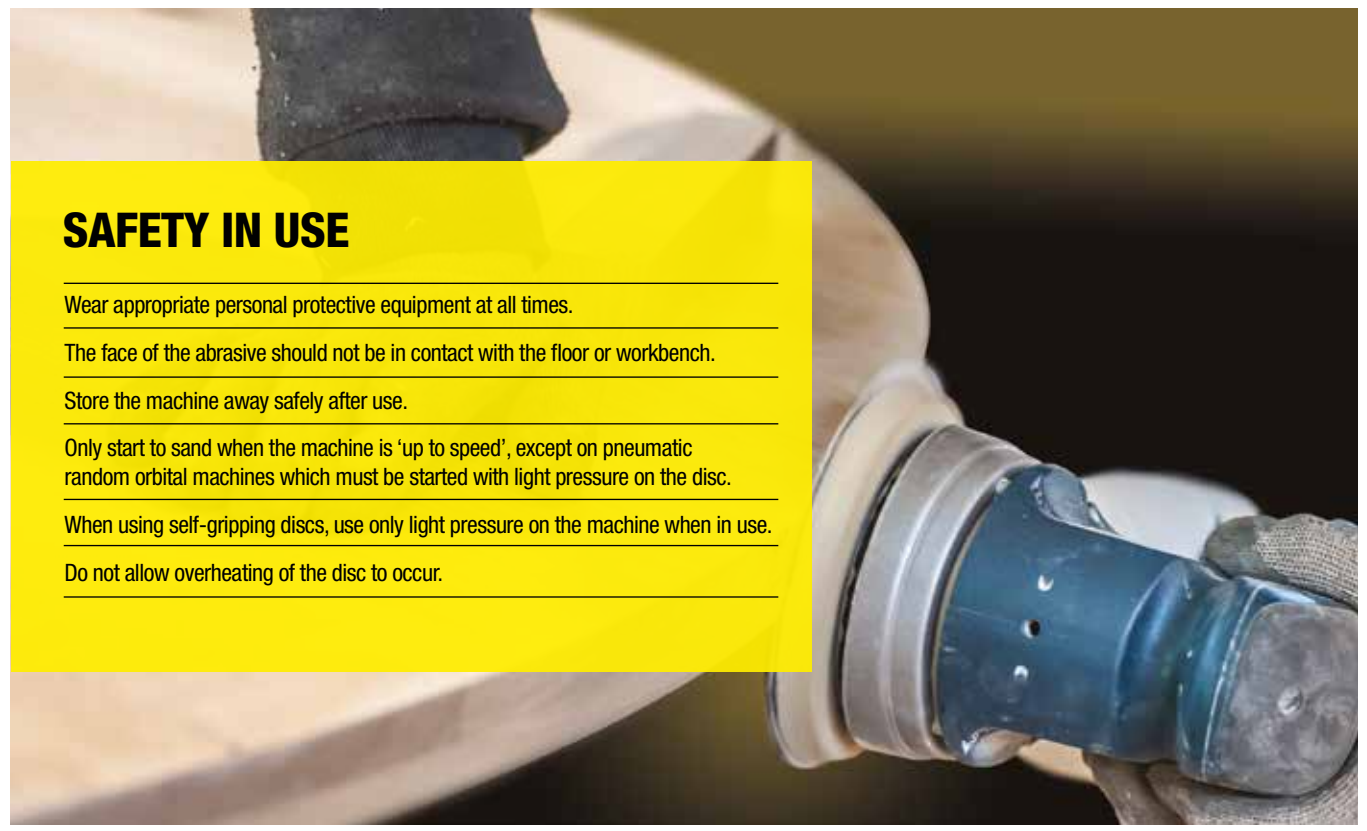

SELF-GRIP

Aluminium oxide grain provides a fast cut when sanding wood, composites, paint or metal. The strong paper backing is tear resistant, while providing good flexibility. No-Fil® coating and hole configuration improves load resistance for longer disc life.

SAFETY IN USE

- Wear appropriate personal protective equipment at all times.

- The face of the abrasive should not be in contact with the floor or workbench.

- Store the machine away safely after use.

- Only start to sand when the machine is 'up to speed', except on pneumatic random orbital machines which must be started with light pressure on the disc.

- When using self-gripping discs, use only light pressure on the machine when in use.

- Do not allow overheating of the disc to occur.

DISCS FOR ORBITAL SANDERS

SANDING DISCS 157 **SILVER** ★★

Aluminium oxide abrasive and heavy paper backing design for roughing, intermediate sanding & finishing of solid wood on floor & furniture applications. Semi-open / open coat (depending on grit size) reduces clogging on the disc for longer life. The anti-static properties of the disc enable excellent surface quality

FOAM ROLLS P37C**SILVER** ★★

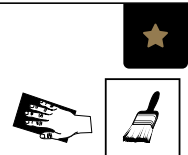

Exceptional flexibility and foam lamination for better conformability to various surfaces. Roll folds without tearing and conforms to contours. Special sterate layer applied to grain minimises clogging for load resistance and longer product life. Pre-perforated rolls can be torn off from the dispenser box to the desired length.

NON-WOVEN DISCS FOR ANGLE GRINDERS

ATLAS SURFACE CONDITIONING DISC **SILVER** ★★

Consists of high-performance enhanced abrasive grain for aggressive action for deburring, rapid light stock removal, whilst finishing the process in a shorter time and increasing the quality of the part. Combines 2 steps of cutting power with acceptable finishing level in 1 action. It gives the best results at 6000rpm. ideal for Stainless steel (INOX) applications.

DIM (mm)	PK QTY	ART NO.	EAN CODE	PRICE (€)
115 x 22,23 x 12	10	78072756234	8681282240999	0,00

ATLAS FINISHING DISC **SILVER** ★★

Fine silicon carbide grains combine with its flexible structure to provide a controlled and smooth finishing. Steel, stainless steel and non-ferrous materials. It is a great option for a fine or satin finish on metals. Reduce grinder speed to approx. 6000 RPM for optimal results.

SELECTING THE RIGHT PRODUCT

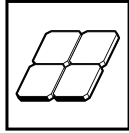

The Atlas product line contains a wide range of diamond blades suitable for many different applications, in sizes ranging from 115mm to 350mm diameter, for use with Angle Grinder, Petrol Saw, Masonry Saw, Tile Saw, and Floor Saws. When choosing a diamond blade, it is important to carefully consider the material to be cut as using the blade for its specific purpose prolongs the life and cutting speed.
